

Energy Committee Meeting
9 January 2015 - Minutes

Attendees: Bob Ericson, Jack Hickey, Gordon Zaks

The National Grid representative, Matthew Whittemore, a Energy Efficiency Specialist, e-mailed us a query for more information on the school, the return email is attached . The company's name is: Guardian Energy Management Solutions, of Marlborough, MA. They work for National Grid, WMECO, Northeast Utilities, and other energy suppliers.

The chair will ask J. Barry about the forms to be submitted by **the 14 of January.**

Answer: they were sent to the Town, but none of the Committee members.

Is there an Energy Control System Manual at the school; or is it available on-line; or is it available from the architects: Dore & Whittier?

Guardian – ask for immediate quote for weatherization of the school. Done – see attachment.

Would a Heat-pump type water heater apply at the school ? Ask Guardian.

Design and install the Control system for the roll up doors at the fire station, which would shut off the large are gas heaters when any of the garage doors are in the open position, or opening or closing.

Answer: Checked with Tom of Overhead Doors, who has worked on both the fire station and the DPW doors, who suggested a simple micro-switch that senses door closed, and a cascade relay box with trouble-shooting lights to notify what door is open.

Check into replacing the Fire Station lights - ballasts and bulbs.

Check into replacing the Fire Station door seals on the outsides.

Call Guardian for names, etc. of visitors to the school on the 30th of December.

Next Meeting: Tuesday 13 January 2015 at 9:00 AM at the Town Hall.

Bob Ericson , Chair
